Mr. Tolga SALMAN  
Founding Honorary  
President

## *We Have Been With You Since 1999...*

*It is a well-established company with 23 years of experience, taking firm steps towards becoming a global brand that produces high quality dermocosmetic products and food supplements that can compete with or even surpass world giants that develop commercial relations in almost every country of the world.*

*Our founder Tolga SALMAN has developed many products in the field of herbal products, herbal cosmetics, food supplements since 1992, and has also taken a leading role in the expansion of the sectoral market. Our founder Tolga SALMAN is a leader with a vision that follows the developments in the world and leads our country in these innovations.*

*In 1999, it released the first hair reduction cream developed with nano technology. Again in the 2000s, he conducted research in the field of Apitherapy and offered pollen and royal jelly products in our country under the name of Apitherapy and received great acclaim. Our academic staff, led by our founder Tolga Salman, broke new ground by bringing Sambucus nigra, Type 2 collagen, procapil-containing shampoo, IGF-containing biotech hair products, odorless fish oil with liposome technology, and many innovative products to our country years ago.*

*After 10 years of studies on psoriasis between 1995 and 2005, Dermo Clean introduced the plant-based Psoriasis Eczema series to the market and received*

*a great demand from psoriasis patients. It is still recommended by doctors and sold under the brand name of SDF 19 in pharmacy channels. Dermo Clean has developed new products for more than 400 companies since 1999, allowing these companies' products of their own brands to take place in the Turkish market. One of the oldest and most important dermocosmetic companies in Turkey, İstanbul İlaç Dermo Clean laboratories are located in Turkish pharmacies with nearly 50 products. In addition to contract manufacturing in the domestic market, it continues to export to nearly 30 countries in the foreign market.*

*Our stance that never gives up on integrity, regardless of the conditions, and our hardworking honest teammates and academic staff have contributed greatly to the success we have achieved today.*

### *Our Goal*

*We will continue to represent our country in the world with our academicians, clinical researches and scientific studies that shed light on our path, and we will continue to grow by discovering better and newer. In the upcoming period, we will continue to produce as one of the leading industrial establishments of our country, to deliver our products to our valuable customers in different parts of the world, and to work without compromising our principles.*
